Your Trusted Mission Partner

Our commitment to better serve our customers and drive value by offering “game changing” solutions is the inspiration behind **USmax iLab**. iLab is a combination of:

- Emerging technologies with the latest and most optimum hardware and software applications needed to innovate
- Our ability to invent, innovate and improve solutions offers our clients significant benefits for reducing costs, yielding more robust designs, and shortening the cycle times of new product development

Success Stories

For the **FEMA Office of Response and Recovery** the **USmax iLab** evaluates service containerization of cloud hosted **AWS ESRI ArcGIS Enterprise** for future use in production operations during National Disasters.

For a **Department of Commerce** agency, **USmax iLab** innovated, tested and implemented a virtual environment in an enterprise **Network Operations Center (NOC)**. Our solution provided the agency the ability to rapidly test and deploy cost effective solutions to the community.

One of the largest provider of durable medical equipment (DME) in the Mid-Atlantic region relied on **USmax iLab** to develop a **Logistics Route and Scheduling** optimization solution to efficiently distribute medical equipment.

The experts at **USmax iLab** innovated a routing algorithm utilizing the **TourSolver Software Development Kit (SDK)** from **Magellan Ingénierie**. The innovation resulted in a three-fold increase in capacity to deliver equipment, with no increase in resources or operations.

Why USmax:

- Award winning - SBA SDB (Small Disadvantaged Business)
- Mission focused, zero-debt company
- An attentive and accessible executive leadership team
- Successful prime with large and small business as subcontractors
- We provide enterprise full lifecycle Security and IT expertise
- We develop and apply best-practice standard operating procedures for repeatability and dependability; reducing costs
- Proven support for OCONUS Hi-threat and Austere environments
- Mature management capability to support complex contractual requirements. DCAA approved accounting system
